

Concept Work Completed Since January 1, 2019
As of June 21, 2019

Concept Title / Hyperlink	Completed	Summary of Work
Grade 9 Achievement Index	6/21/2019	- update concept information and add internal link to the Grade 9 Achievement Index SAS code.
Oral Anticancer Agents (OAAs) - Method of Identification	6/11/2019	- create a new concept describing the methods used to identify Oral Anticancer Agent (OAA) and non-OAA medications in the "Outpatient Oral anticancer Agents in Manitoba" Deliverable (2018).
Hospital Newborn to Mother Link Registry	6/10/2019	- update information reflecting that the NB to Mother Registry file has been updated to include 2017/18 hospital data. Add linkage results doc to Metadata Repository and create link to this doc from the concept.
Alcohol Use Disorder (AUD) / High-Risk Alcohol Use - Method of Identification	5/24/2019	- create a new concept that describes how alcohol use disorder (AUD) and high-risk alcohol use was defined in the "Health and Social Outcomes Associated with High-Risk Alcohol Use" Deliverable (2018).
Income Quintiles - Child Health Income Quintiles	4/24/2019	- update internal SAS Code and Format file, update document containing range of rural and urban IQ values from 1979 to 2017, and update concept text to reflect updated range of values.
Child Health Indicators - 2012	4/15/2019	- create a concept listing the Child Health indicators used in the "How Are Manitoba's Children Doing?" Deliverable (2012).
Socioeconomic Factor Index (SEFI) - Version 2 (SEFI-2)	2/19/2019	- update information in concept that SEFI-2 formats are now available for 2017.
Early Development Instrument (EDI) Outcomes	2/11/2019	- update concept with information on the availability of EDI SAS macro code, and add link to related PowerPoint presentation from the January 23, 2019 Data Analysts meeting. SAS macro code and PowerPoint presentation only available internally.
Grade Level Assessments	2/11/2019	- update concept with information on the availability of SAS macro code for each grade level assessment, and add link to related PowerPoint presentation from the January 23, 2019 Data Analysts meeting. SAS macro code and PowerPoint presentation only available internally.
Several Entries Affected - see Medical Claims Data Description - Data Cautions for more information	1/16/2019	- update content in several Concept Dictionary entries / Glossary terms noting the Medical Services / Physician Claims data structure now contains a 5-digit ICD-9-CM code variable. A 5-digit code may not be entered for all records, and is only relevant for data from 2015/16 fiscal year forward.
