## Health Indicators: Iron Supplement Rates by Region

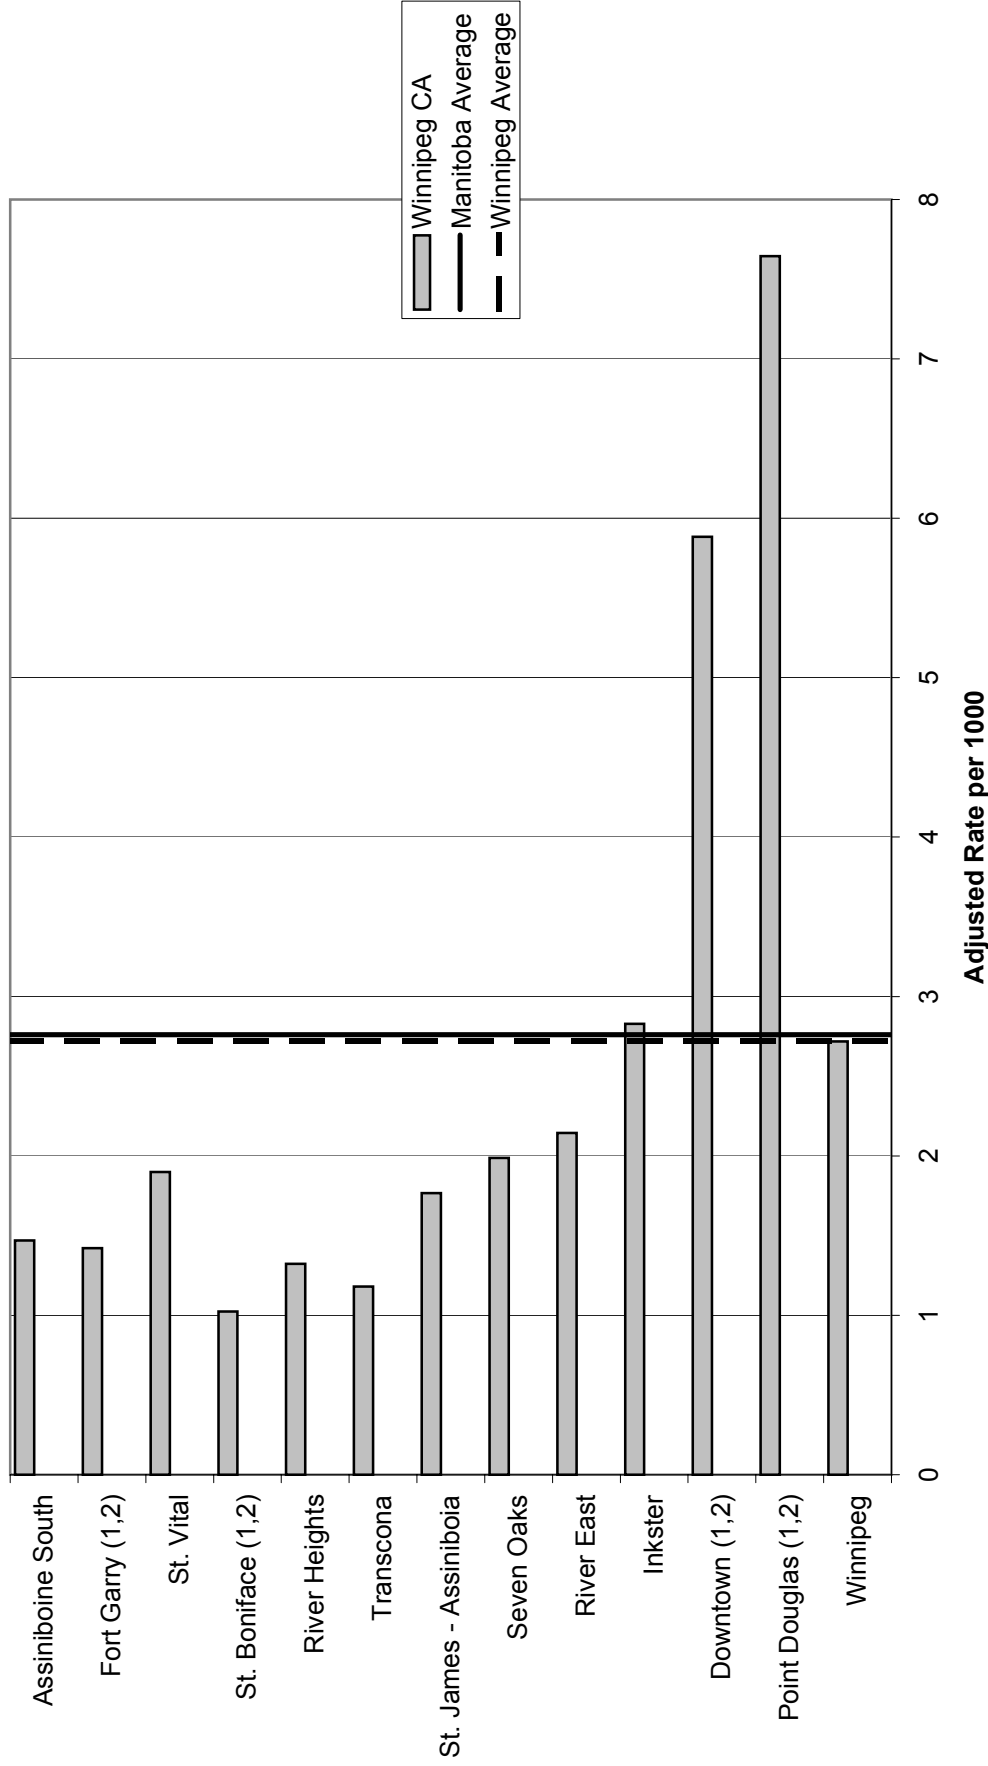

About 825 children received treatment for iron deficiency anemia in 2001/02, up from 540 in 1998/99 (see *Assessing the Health of Manitoba Children: A Population-Based Study*). South Eastman and Central RHA had significantly lower rates of iron supplement prescriptions compared to the provincial average; the rates for Parkland, Nor-Man and Burntwood were significantly higher than the provincial average. In Winnipeg, Fort Garry and St. Boniface has significantly lower rates of iron supplement prescriptions than both the provincial and Winnipeg rates; the rates for children in Downtown and Point Douglas were significantly higher than both the provincial and Winnipeg rates.

**Rate of Children Aged 0-19 with One or More Iron Supplement Prescriptions  
by Manitoba RHA, 2001/02**

'1' indicates rate significantly different from the Manitoba mean  
's' indicates data suppressed due to small numbers

**Rate of Children Aged 0-19 with One or More Iron Supplement Prescriptions  
by Winnipeg CA, 2001/02**

'1' indicates rate significantly different from the Manitoba mean

'2' indicates rate significantly different from the Winnipeg mean

These definitions can be found in the Child Health Atlas Glossary:  
[http://www.umanitoba.ca/centres/mchp/reports/child\\_inequalities/glossary.shtml](http://www.umanitoba.ca/centres/mchp/reports/child_inequalities/glossary.shtml)
