Manitoba Child Health Atlas

March 2006

Manitoba Centre for Health Policy

Department of Community Health Sciences Faculty of Medicine, University of Manitoba

The entire report is available on this WWW site: http://www.umanitoba.ca/centres/mchp/reports/child_inequalities

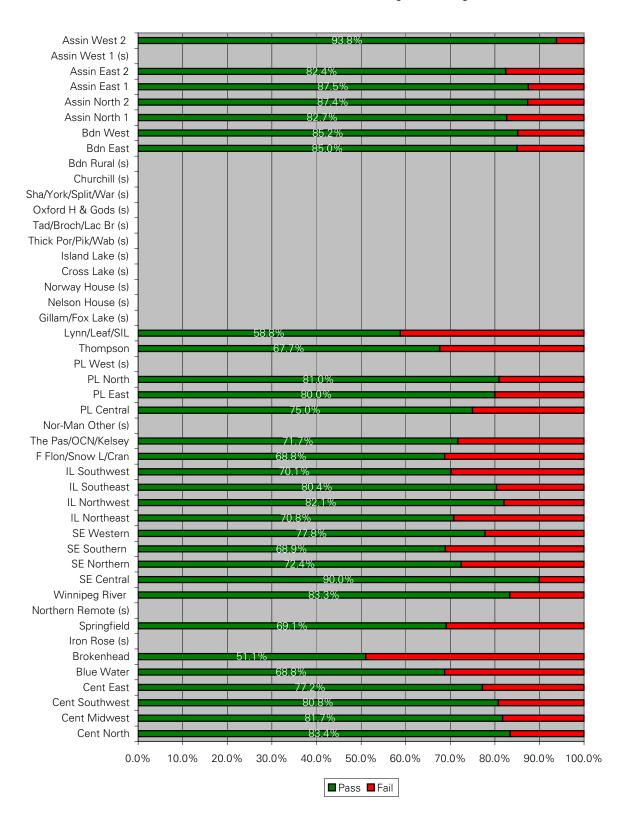

Education Indicators: S4 Math Standards Test by Manitoba RHA District

The first graph presented here (Graph - Left Side) reflects what the schools see when they review the performance of students taking the math standards tests: the percent of students who passed the exam ranged from 94% to 51%. However, these numbers only represent part of the story because they are selectively reporting results for students who are in school, in Grade 12, and writing the standards tests. The larger question is: What happens when we focus on who should have been writing the standards test at that time? This very different story is told by the second graph (Graph - Right Side). To develop this graph we first identified all children who were born in Manitoba in 1984, and who remained in Manitoba until 2001/02 (84%), and who should have been writing the Grade 12 exam in the 2001/02 school year. The second graph depicts this very different reality: the percent who passed now ranges from 63% to 16% (districts with suppressed data not included here). About 11% to 60% were behind at least one year (in Grade 11 (S3) or lower), and 6% to 74% had withdrawn from school (not enrolled in school for at least 2 years). Many of the students, particularly those from less advantaged areas, had not yet made it to Grade 12, and many were not in school at all. Both graphs show the Manitoba areas ordered by SES, with the most advantaged areas at the top of the graph and the least advantaged areas at the bottom of the graph. Note that an estimated number of students expected to be enrolled in band-operated schools were removed from the analysis.1

¹Some students in the 18 year cohort were enrolled in a band operated school in 2001/02. Enrollment data for band-operated schools is only partially reported to the provincial Education Information System (EIS). Students in band-operated schools and not in EIS enrollment data would be misclassified as withdrawn, so an estimated

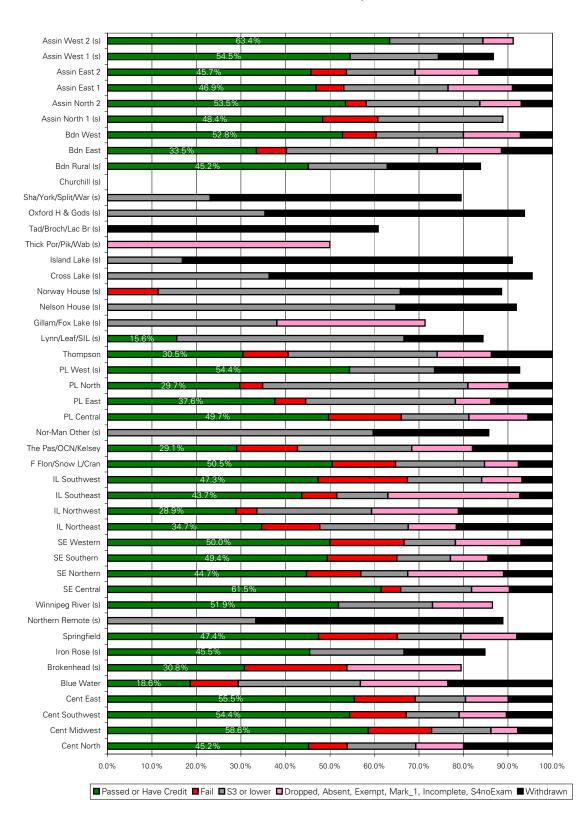

Grade 12 (S4) Math Standards Test Performance, by District, 2001/02

(Pass/Fail rates of all test writers, regardless of age)

Grade 12 (S4) Math Standards Test Performance, by RHA, 2001/02

(cohort of children born in 1984, expected to be in S4 in 01/02)

2001/02 S4 MATH Standards Tests Writers: RURAL (excl. BAND operated schools)
