**Figure 3.100: Neural Tube Defects Rates
by Aggregate RHA Area**

Sex-adjusted rates per 1,000 infants aged <1 year

'1' indicates area's rate was statistically different from Manitoba average in first time period

'2' indicates area's rate was statistically different from Manitoba average in second time period

't' indicates change over time was statistically significant for that area

's' indicates data suppressed due to small numbers
