

Figure A.5.49: Rate of Children Aged 1-4 Years With at Least One Hospitalization for Lower Respiratory Tract Infection by Winnipeg Community Area

Age- and sex-adjusted rates per 1,000 children

'1' indicates area's rate was statistically different from Manitoba average in first time period
 '2' indicates area's rate was statistically different from Manitoba average in second time period
 't' indicates change over time was statistically significant for that area
 's' indicates data suppressed due to small numbers
